

CASE STUDY //

Tameside College ALC

Tameside College adult learning centre was an installation which completed in the summer of 2015. This was a new build development carried out by main contractor, Kier. On this project our scope was to design and install the heating, chilled and domestic water systems. We installed a roof top plant room, full central heating system, chilled water/cooling system, domestic hot water system, potable boosted cold water system along with Cat 5 boosted cold water system, 4 male and 4 female toilet block installations and 4 disabled bathrooms.

This project was carried out within the agreed timescales and delivered to the highest standard, so much so that Kier offered us the opportunity to take on phase 2, Tameside College engineering block, this project started in November 2015.
